

JOURNAL OF MATHEMATICAL ANALYSIS AND APPLICATIONS 33, 700 (1971)

Erratum

Vol. 31, No. 1 (1970), in the article "Measures on Semigroups and Some Representations", by Andre de Korvin and Richard J. Easton, pp. 140–146:

The space H should be assumed compact.

In Corollary 3, S should be a subsemigroup closed under complex conjugation.

It should also be pointed out that S is for free a linearly independent set, and that any abelian semigroup which is a union of groups has the $*$ property, thus the assumption that H has the $*$ property can be deleted from Corollary 3.
